Re: Manning of vacancies in unassigned pools

Dear Sir:

Recently we have encountered situations where the language of our 7 day board agreement does not conform with the understandings our membership have for weekly crew change set ups for our unassigned freight pools and spare board.

This letter proposes that we modify the 7 day board practices so Locomotive Engineers be able to bid an unassigned freight pool or spare board on their weekly bid card with no distinctions between ownership and vacancies.

This applies to the unassigned freight pools and spare board only and does not affect any assigned pools or jobs. All other provisions of the 7 day board agreement and the collective agreement remain in effect.

Should you agree with the above please indicate your concurrence below.

Yours truly,

G.A. Edwards
Local Chairman

I concur,

Tim Schumacher
Service Area Manager
