Brothers and Sisters,

As many of you know Greg Edwards has moved on to a permanent position with the Western General Committee and as such a void has been created here in Revelstoke. Greg has tried to help when he can but his responsibilities to the General Chairman limit that ability. As such the Engineers will need to hold an election sometime in the fall or New Year depending on other possible vacancies. In the meantime I will be acting in accordance with established bylaws specifically Division Rules Section 16 (d) and setting up an appointed vice local Chairman until elections can be held.

I have been hoping for some time have a member who is a little younger than our present Engineer reps and someone who at least now is working more on the Mountain Sub. With that in mind I will be appointing Sean Cadden to start immediately. Sean is well respected and I feel all would agree a trustworthy member. I am acting with some haste at this time because work is piling up and your interests need to be served in such a way that we are able to stay on top of all aspects of representation.

We will be fast tracking Sean locally with Greg, Dave and I passing on what he needs to get started and begin representing the membership. It is our hope that Sean will be able in the future to represent members in investigations as well as other areas.

Please welcome Sean, and feel free to rib him as well, he can be contacted at 250-814-8479.

Fraternally,

Les Daley
LC Engineers
